Objectives of the Summer School
The School 2017 offers an interesting opportunity for students from India and Germany in the field of water management and engineering. With a focus on sustainable urban water and wastewater management, the School intends to initiate an Indo-German dialogue on sustainable challenges and future solutions. In collaboration with the Research Institute for Water and Waste Management at RWTH Aachen University (FiW) and other partners, we offer a program of lectures and case studies by representative scientists and experts from India and Germany complemented with topic-related field trips to water authorities, water boards and drinking water utilities in the region of Aachen. Participating students are given an insight into technological concepts and management approaches during own project group work. In order to create an interdisciplinary atmosphere, we welcome interested students with different backgrounds to apply.

Indo-German Centre for Sustainability (IGCS)
The IGCS is a joint Indo-German centre developing fundamental and applied interdisciplinary research, teaching and training, and dissemination of information in the area of sustainable development. The IGCS wishes to be one of the premier centres of excellence in the field of engineering and environmental sciences. It aims at offering cutting edge solutions in sustainable research through bilateral relations between India and Germany.

IGCS is coordinated by RWTH Aachen University and IIT Madras and funded by the German Academic Exchange Service (DAAD) in the program „Anew Passage to India“. Research projects are funded by DST, Government of India.

Contact
For all matters concerning visa and funding please contact Ms. Eva Portius | portius@igcs-chennai.org.
For all course related matters please enquire by checking the IGCS-website.

Organizers
IGCS Centre Coordinators
Prof Dr Rafig Azzam,
Head of Department of Engineering Geology and Hydrogeology, RWTH Aachen University

Prof Dr BS Murty,
Department of Civil Engineering, IIT Madras

IGCS Area Coordinators
Prof. Dr. N. Fohrer,
Kiel University

Prof. Dr M. Kranert,
University of Stuttgart

Prof Dr Ligy Philip,
Department of Civil Engineering,
IIT Madras

IGCS Staff
Ms Eva Portius, IGCS Project Manager,
RWTH Aachen University
